Beni Mellal, Morocco

ABOUT

Self-taught and passionate about technology, I bring over 1.5 years of hands-on experience as a Web Developer. Known for delivering innovative and reliable web solutions, I have successfully completed multiple client projects with a strong focus on performance, usability, and clean code.
I specialize in building full-stack applications, and my work has consistently led to high client satisfaction. I take pride in translating complex problems into simple, effective digital solutions — driven by a genuine passion for programming and continuous learning.

EXPERIENCE

ZipInClick - Multi Vendor Digital Platform   Mar 2025 - June 2025

Built a SaaS digital marketplace with Laravel 12 and Blade, including subscriptions, multi-vendor features, and admin controls — launched on CodeCanyon for commercial use.

Anon - Multi Vendor (e-commerce) Platform   June 2024 - October 2024

Developed a highly scalable backend from scratch with Spring boot,Spring Security and Postgresql

Built the frontend using Angular 16 for a seamless full-stack web application

ConstructionXS - Microservice-based modules   July 2024 - Aug 2024

Built a microservice architecture for ConstructionXS using Spring Boot and Angular, delivering a scalable and responsive web application
